

Date	Presenter	Title
17.05.2017	Ganga Ram Maharjan	Assessment of soil and climate data aggregation effects on crop yields: from local to regional application in NRW, Germany
31.05.2017	Miltin Mboh	Effect of bio-pores on the stability of winter wheat yields
07.06.2017	Amit Srivastava	Effect of mineral fertilizer on water and radiation use efficiencies for maize yield and biomass productivity in Ethiopia
14.06.2017	Wenzhi Zeng	Development, validation and calibration of an intercropping model
21.06.2017	Hubert Hüging	Results from the Dikopshof, CKA experiments
28.06.2017	Ehsan Eyshi Rezaei	The influence of the experimental setup on crop responses to heat
05.07.2017	Sabine Seidel	Model-based estimation of the impact of climate variability and pre-crops on spring wheat growth, water and nutrient uptake
12.07.2017	Thuy Nguyen	Towards improved process representation for modeling CO ₂ and H ₂ O fluxes of crops
19.07.2017	Andreas Tewes	Remote green LAI estimation in maize using UAV-based camera imagery: Impact of plant density and nitrogen fertilisation
26.07.2017	Jürgen Schellberg	Abschiedsvorlesung – Grassland matters
